DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6,9,10,13-18,20,21,24-28,30,31,34-39 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Schwartz et al. (2003/78617). Fig. 17 shows a wedge-shaped tissue scaffold. Schwartz et al. disclose the tissue repair device comprises a porous resorbable material, paragraphs 16,17. Schwartz also discloses the material can be synthetic, paragraphs 83,86,94. It can be seen the implant includes top and bottom portions **24,26** respectively. Fig. 34 illustrates the top and bottom portions can be mated to one another. Schwartz additionally shows (Fig. 23) that there is a tissue material **22** placed in a pocket or hollow interior or lumen that extends from the greater height to the tapered smaller end and is formed between the top and bottom portions. Bioactive substances can be added to the tissue material, paragraphs 130,131. Schwartz et al. disclose that tissue is obtained and comminuted (i.e. mince, slice or sliver) to smaller fragments and then loaded between or within the pocket of the tissue scaffold, paragraphs 16,17,83. Figs. 26 and 31 show the implantation is done

such that native tissue **12** abuts the opening of the pocket to maintain the tissue **22** therein.

Response to Arguments

Applicant's arguments with respect to independent claims 1,13,24,34 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
